

Exhibit Information

Station 3 NOAA Kids Zone

Here you will find:

Interactive activities for kids of all ages

- a. Ecosystem drawing tablets...color the ship, sea or sky.
- b. Weather in a bottle creates a lasting memory of storms
- c. Whale origami demands creative expertise in paper folding
- d. Microscope-Sand Activity

For each station there will be a volunteer to assist with the day's activities. Detailed instructions will be included and training will take place prior to shift change. Due to a reduction in tent size, we may have to limit the activities to only one per day. This will be a decision made onsite after exhibit set up.

Talking points:

Ecosystem drawing tablets

1. Kids can color either inside the lines or outside the lines, point out the TJ across the Harbor and make the connection to their tablet
2. Parents can join them in the fun and learn about NOAA meaning Oceans & Air

Weather in a bottle

1. Ththths
2. Sjdjdj
3. Cjcjcjc

Microscope-Sand Activity

4. Ththths
5. Sjdjdj
6. Cjcjcjc
- 7.

Whale Origami

3. Whales are the largest animals that ever lived on the Earth.
4. They are even bigger than dinosaurs!
5. There are 78 different kinds of whales swimming in the oceans around the world.
The whales that the people on those boats racing in the Volvo Ocean Race need to watch out for are called Right Whales....they don't want to hit them with their boats as they travel up the Atlantic coast.
